Energy Efficient Lighting Fixtures, Retrofits, and
Custom Fixture Design

50101 AND 50101 LED SNOOK LIGHT

The classic shape of the Snook Light provides a pleasing spread of light, reminiscent of historical times. This fixture is adaptable to an optional LED light source to provide lighting with a miserly 10 watts of power (16 watts optional), comparable to that of a 60 - 100 watt incandescent lamp. The Snook Light features a rust-proof spun aluminum body, durable powder coat finish, and porcelain enamel incandescent socket with nickel-plated brass screw shell for long-life and durability. Custom color is available. Refer to the "Accessories" section for lead wire, Hub size and mounting pole options.
